

# Elena Belkina

## Full Stack Web Developer

Moscow, Russia

<https://github.com/avbmoons>

[evb.moons@gmail.com](mailto:evb.moons@gmail.com)

<https://avbmoons.github.io>

I'm a web developer. I have experience of approximately two years in website development. Besides, I have been involved in IT for a considerable period engaging in business and system analysis, designing modules, systems, and websites. I am now capable of implementing the designs I create into actual code.

## Some about

Considering to necessary for know not only “what”, but also “how” in making of IT-systems, I have be able come to IT-development from IT-analytics, and also planning to apply my previous experiences for.

I am skilled in creating layouts and scripts using native technologies, and have expertise in using VueJS and working with ReactJS while applying Sass for styles creation.

I have a preference for using Laravel in backend development although I am equally adept at working with native PHP.

My skill set includes proficiency in various tools such as Docker, Ubuntu, and GitHub.

At ones I can manage the project for a handful of developers in Trello, Jira etc., also maintain a common repository in GitHub, present a project and its result I have experience in leading development teams and managing projects using platforms such as Trello, JIRA, and others. I have also been maintaining a common repository on GitHub.

I am excited to enhance my abilities, acquire knowledge about newer technologies and leverage my previous experience in fresh ventures where my contribution can be valuable.
